

Truck-Mounted Concrete Boom Pump

This is a concrete boom pump mounted on a multi-axle truck chassis. It is designed for efficient and high-volume concrete delivery in construction sites.

Overview

High-Efficiency Concrete Delivery

This heavy-duty truck-mounted concrete boom pump is engineered for precise concrete placement on demanding construction sites. Featuring an articulated boom system and a robust multi-axle chassis, it ensures optimal stability and weight distribution during operation. Designed for high-volume delivery, this machinery integrates advanced hydraulic systems to streamline concrete pouring tasks efficiently.

Technical Specifications

Boom Length	46 m
Chassis Configuration	Multi-axle
Key Systems	Hydraulic Boom Operation, High-Volume Concrete Pumping, Articulated Boom

Identification

Model Identifier	BTS212131788
Series Code	L-S-41
