

# Truck Mounted Concrete Mixer Pump

The truck-mounted concrete mixer pump combines concrete mixing and pumping capabilities on a mobile platform. This unit provides an efficient solution for concrete placement in various construction projects.

## ADDITIONAL IMAGES

## Overview

### Versatile Concrete Solutions

This truck-mounted concrete mixer pump integrates essential mixing, pumping, and transportation functions into a single mobile unit, optimizing on-site efficiency. Engineered for high delivery output and precise placement, the system is suitable for diverse construction tasks including urban infrastructure, high-rise buildings, and bridge projects. Its robust design minimizes labor costs while ensuring consistent concrete quality, making it a reliable asset for various job site environments.

## Technical Specifications

### Available Boom Lengths

- 25m
- 29m
- 33m
- 42m
- 50m

### Pump Models

HBT30, HBT40, HBT50, HBT60, HBT80, HBT90, HBT100, JBTS30, JBTS40

## Components

### Core Component Brands

| Category          | Source/Brand                                       |
|-------------------|--|
| Chassis           | Mercedes-Benz, Isuzu, Dongfeng Ace, Sinotruck Howo |
| Power System      | Deutz, Cummins, Weichai                            |
| Hydraulics/Valves | Rexroth, Kawasaki, Atos                            |
| Hoses/Seals       | Manuli, Parker, NOK                                |

## Applications

### Primary Applications

Industrial Buildings • Civil Buildings • Highway Construction • Railway Construction • Bridges • Mines • Wharfs • Urban Infrastructure • Tunnels
