

# Truck-Mounted Conveyor Belt System

This truck-mounted conveyor belt system is engineered for efficient material handling in various industrial applications. The system features a telescopic boom and multiple hydraulic cylinders, mounted on a multi-axle truck chassis for enhanced stability.

## Product Overview

### Heavy-Duty Material Handling Solution

This truck-mounted conveyor belt system is engineered for high-efficiency material handling in demanding industrial environments. Featuring a robust telescopic boom and a multi-axle chassis, it provides exceptional stability and reach for diverse loading and unloading tasks. The integration of advanced hydraulic cylinders and a heavy-duty chain-drive mechanism ensures reliable performance and durability under heavy loads.

## Technical Specifications

### Operational Features

- Hydraulic cylinder control
- Heavy-duty load distribution
- High-capacity material handling

Chassis Configuration	Multi-axle truck
Drive System	Chain Drive, Conveyor Belt
Boom Design	Telescopic

## Performance Metrics

### Stability Rating

Industrial Grade • Heavy-Duty
