

Truck Mounted Crane with Telescopic Boom

This truck-mounted crane has a telescopic boom and requires an installation space of 900mm. It has a maximum lifting capacity of 6300kg and a max lifting moment of 15.7/10t.m.

Overview

High-Performance Telescopic Boom Crane

The SQ6.3SK3Q is a professional-grade truck-mounted crane engineered for versatile industrial and construction lifting tasks. Featuring an efficient telescopic boom design, it provides excellent reach and precise control across varied operational environments. Its robust construction ensures stability during intensive use, while advanced hydraulic controls allow for smooth and secure material handling.

Technical Specifications

Lifting Capacity vs. Radius

Working Radius (m)	Lifting Capacity (kg)
2.5	6300
3.96	2800
6.3	1600
8.6	1200
11	600

Maximum Lifting Capacity

6300 kg
Max Capacity

Features

Key Operational Features

- Telescopic boom design
- High-stability chassis
- Precision hydraulic controls
- Integrated safety mechanisms
