

# Truck Mounted Drilling Rig

This truck-mounted drilling rig integrates the main power, transmission, control, and hoisting systems into a single transportable module for fast setup. It utilizes a telescopic mast and swing-up substructure, and can be equipped with one or two engines with an independently driven mud pump.

## Product Overview

### High-Efficiency Truck-Mounted Drilling Rigs

These truck-mounted drilling rigs are designed for professional petroleum prospecting and wellbore operations. Featuring robust lattice-structured derricks and powerful drawworks, they offer stable, reliable performance for deep-well drilling projects. Available in multiple configurations, these units provide the high static hook loads and power necessary to support demanding drilling environments.

## Technical Specifications

### Model Performance Data

Model	Nominal Depth	Drawworks Power	Max Hook Load
ZJ10CZ	1,000m	260KW	90mt
ZJ15CZ	1,500m	335KW	112mt
ZJ20CZ	2,000m	400KW	158mt
ZJ30CZ	3,000m	550KW	180mt
ZJ40CZ	4,000m	745KW	225mt

### Primary Applications

Petroleum Prospecting, Wellbore Drilling, Exploration, Production
