Overview

Versatile Lifting Solution

The SQ200ZB4 is a high-performance truck-mounted crane engineered for demanding construction, logistics, and industrial applications. It features a robust telescopic boom system that ensures extended reach and operational flexibility for heavy-duty tasks. Equipped with integrated hydraulic outriggers and a heavy-duty chassis, this crane provides exceptional stability and mobility on varied job sites.

Performance Specifications

Maximum Lifting Capacity

20 tons

Capacity

Maximum Lifting Height

20 m

Rotation

360-degree continuous rotation

Technical Features

Boom Type

Telescopic

Safety Mechanisms

Overload protection, Emergency stop, Hydraulic outriggers

Control System

Advanced hydraulic controls
