

# Truck Mounted Vegetation Trimmer

This truck-mounted vegetation trimmer is designed for roadside maintenance. The equipment features a hydraulic arm with a rotary cutting head, capable of trimming vegetation at various angles and heights.

## Product Overview

### Professional Roadside Maintenance Solution

This truck-mounted vegetation trimmer is engineered for heavy-duty roadside maintenance and landscape control. It features a highly versatile hydraulic arm equipped with a robust rotary cutting head for precise trimming at varying heights and angles. Built for efficiency, the system includes an integrated hydraulic power unit and comprehensive safety measures, including protective guards and warning lights.

## Technical Specifications

### Engine Power Output

**122 kW**

Power Rating

### System Features

- Hydraulic arm with rotary cutting head
- Multi-angle and height adjustment
- Dedicated hydraulic power unit
- Integrated safety protective guards
- Operational warning lights

### Equipment Load Capacity

140 kg

## Compliance and Applications

### Primary Applications

Roadside Maintenance, Vegetation Control, Landscape Maintenance
