

Truck Rear Bumper Bar

This rear bumper bar is made for trucks. It is constructed from high-strength steel for maximum protection and durability.

Product Overview

Rugged Rear Protection

This heavy-duty rear bumper bar is engineered specifically for Great Wall P-series trucks to provide robust protection and enhanced off-road performance. Constructed from high-strength carbon steel with a durable sandy black powder-coated finish, it ensures maximum corrosion resistance and longevity. The design integrates essential features such as a tow hitch receiver, recovery points, and LED lighting to improve both utility and safety for the professional user.

Technical Specifications

Primary Material	Carbon steel
Surface Treatment	Sandy black powder-coat

Compatibility & Features

Integrated Features

- Tow hitch receiver
- Recovery points
- Integrated LED lights
- Parking sensor compatible

Compatibility	Great Wall P-series
Installation	Includes all necessary mounting hardware
