

Tube Blindstitch Sewing Machine

This specialized sewing machine is designed with a single curved needle and single-thread chain for creating blind stitches. It is used for sleeve cuffs, trouser cuffs, and to sew edges of cotton, woolen, and chemical fiber textiles.

Product Overview

Professional Tube Blindstitch Machine

The FL-500 is a high-performance tube blindstitch sewing machine designed for precision garment finishing. Featuring a single curved needle and single-thread chain stitch mechanism, it is ideal for handling sleeve cuffs, trouser hems, and various fabric types including cotton, wool, and synthetic fibers. Its integrated skip-stitch apparatus ensures high-quality, professional results with a clean aesthetic.
