

# Tube Cutter Hand Tool

This tube cutter is a hand tool used to cut tubes, typically made of copper, aluminum, or plastic. It consists of a sharp cutting wheel and two rollers that hold the tube in place.

## Overview

### Professional Tube Cutting Solution

This manual tube cutter is an essential hand tool designed for precise cutting of copper, aluminum, and plastic tubing. Featuring a sharp cutting wheel and stabilizing rollers, it ensures clean, burr-free cuts every time. It is an ideal choice for professionals in plumbing, HVAC, and related industries requiring high-quality pipe preparation.
