Product Overview

Professional Tube Terminal Solutions

These T (B) series tube terminals serve as high-performance accessories for electrical connections, specifically designed for copper conductor interfacing. They allow for secure, crimped installations without the need for thermal treatment, ensuring robust mechanical and electrical performance. Manufactured to meet rigorous CE and GB international standards, these components provide reliable connectivity for various electrical equipment applications.

Standards & Compliance

Certifications

CE, GB, ISO 9001:2015, IATF 16949, RoHS

Logistics & Ordering

Packaging Standards

- International standard inner boxes and master cartons
- Maximum 35kg per carton
- Approximately 1000kg per pallet
- Palletized shipping available to prevent damage

Estimated Delivery Time

15 to 30 days depending on order quantity

Technical Capabilities

Sample Availability

Free samples available with a lead time of approximately 7 days based on complexity.
