

Tubular Exhaust Ventilating Fan

This metallic ventilating fan is designed with a tubular exhaust port. It is suitable for installation in ceilings or walls, providing effective air extraction and moisture removal.

Product Overview

High-Efficiency Ventilation Solution

This tubular exhaust ventilating fan is engineered for effective moisture removal and air circulation in confined spaces. Featuring a robust metallic construction with a black housing and a specialized white grille, it is designed for seamless integration into ceilings or walls. Its unique design ensures optimal airflow, making it an ideal choice for bathrooms and similar environments requiring consistent ventilation.

Technical Specifications

Color Finish

Black Housing • White Grille

Installation

Ceiling Mount, Wall Mount

Material

Metallic

Design Features

Grille Pattern

Alternating horizontal and vertical slats

Shape

Square

Application

Recommended Use

- Bathroom ventilation
- Moisture extraction
- General air circulation
