

Tugboat for Marine Operations

This tugboat features a sturdy steel structure and specialized machinery for maritime operations. It is equipped with a crane and communication tower, designed for towing and support activities in marine environments.

Product Overview

Robust Marine Support Vessel

This tugboat is specifically engineered for high-performance marine operations and towing support. Featuring a heavy-duty steel structure, it is designed to withstand harsh maritime environments while maintaining stability and reliability. Equipped with specialized machinery, including an integrated crane and advanced communication tower, this vessel provides versatile support capabilities for diverse maritime activities.

Operational Features

Key Equipment

- Integrated marine crane
- Advanced communication tower
- Reinforced steel hull structure

Applications	Towing, Marine Operations, Maritime Support
