

Tugboat

This tugboat is designed for maneuvering other vessels by pushing or towing them. The boat is highly maneuverable and powerful for its size.

Product Overview

Professional Marine Tugboat

This powerful tugboat is designed specifically for high-stakes marine maneuvers, including pushing and towing operations. Engineered for exceptional maneuverability and compact power, it features a robust protective hull design to withstand demanding operational conditions. Its high-visibility wheelhouse ensures precise navigation and safety, making it an essential asset for port operations and fleet management.
