

Tulip-Shaped LED Bulb

This LED bulb features a tulip-shaped design for optimal light distribution and heat dissipation. It is compatible with standard E26/E27 sockets, offering significant energy savings and bright, consistent light.

Product Overview

Tulip-Shaped LED Bulb

The Tulip-Shaped LED Bulb serves as a high-efficiency lighting solution engineered for optimal light distribution and superior thermal management. Designed as an ideal replacement for traditional CFL bulbs, it features advanced convection technology that increases heat dissipation speed by 30%. This versatile bulb is well-suited for diverse environments including residential areas, parks, stadiums, and parking lots.

Technical Specifications

Socket Compatibility

- E26
- E27

Heat Dissipation Enhancement	30 %
------------------------------	------

Key Features

Design Advantages

- Unique tulip-shaped design
- Middle-hole convection system
- Larger light emitting area

Suitable Environments	Residential, Parks, Stadiums, Parking Lots, Rural Areas
