Product Overview

High-Performance Cutting Solution

This professional-grade tungsten carbide tipped saw blade is engineered for high-efficiency clearing of grass, weeds, crops, and dense brush. Designed for universal compatibility with standard brush cutters and grass trimmers, it features a durable hardened steel body with precision-ground carbide teeth. The advanced design minimizes debris scattering and ensures a fast, clean cut for both intensive commercial and residential landscaping tasks.

Technical Specifications

Blade Diameter	255 mm
Bore Diameter	25.4 mm
Tooth Count	40
Material Composition	Tungsten Carbide Tipped, Hardened Steel Body

Performance Metrics

Suitable Applications

- Thick grass and weeds
- Agricultural crops
- Brush and shrubs
- General land clearing

Key Performance Features

Fast Cutting • High Durability • Reusable • Vibration Reduced • Low Scatter Design
