

# Tungsten Carbide Jaw Plate for Mini Crushers

This tungsten carbide jaw plate is designed for mini-crushers requiring durable and wear-resistant components. It ensures efficient crushing and extended service life.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Tungsten Carbide Jaw Plates

These precision-engineered tungsten carbide jaw plates are designed specifically for high-demand mini-crusher applications. Engineered for superior wear and abrasion resistance, they ensure extended service life and consistent particle size reduction in mining and aggregate processing environments. The durable composition and custom-design flexibility allow for reliable performance in various heavy-duty crushing operations.

## Dimensions

### Dimensions

Dimension	Range
Length	10.0 - 500 mm
Width	10.0 - 500 mm
Height	1.0 - 100.0 mm

## Technical Details

### Surface Finish Options

- Sintering surface
- Ground surface

### Material Composition

WC+Co, WC+TiC+TaC+Co

## Applications

### Primary Industries

Mining • Construction • Aggregate Processing

### Compatible Equipment

- Chutes
- Feed bins
- Fan boxes
- Crushers
- Screen plates
- Fan blades
- Cyclones
- Pipe spools
