

Tungsten Carbide Masonry Circular Cutter

This specialized cutter is designed for making circular cuts in masonry. Its tungsten carbide-tipped (TCT) cutting edge ensures durability and efficient cutting of materials like brick, concrete, and stone.

Product Overview

Professional Masonry Cutting Solution

The Tungsten Carbide Masonry Circular Cutter is a precision-engineered tool designed to create accurate circular holes in challenging materials like brick, concrete, and stone. Featuring a high-grade TCT cutting edge, it delivers exceptional durability and performance in demanding construction environments. Its robust shank design ensures a secure connection to rotary hammer drills, making it the ideal choice for installing electrical boxes and piping.
