Product Overview

High-Performance Tillage Points

These replacement tillage points are engineered with premium tungsten carbide to provide exceptional wear resistance and durability in demanding agricultural environments. Featuring a strategic design with carbide tips on both the front and sides, these points ensure superior soil penetration and extended service life. Each unit is precision-manufactured to improve operational efficiency and minimize machine downtime for professional cultivation tasks.

Technical Specifications

Working Width	3.25 inch
Carbide Placement	Front Carbide, Side Carbides

Compatibility

Equipment Compatibility

- Flexicoil Stealth
- Bourgault

Performance Features

Core Benefits

Wear-resistant • Corrosion-resistant • Extended Service Life • Improved Performance

Technical Design

- Side and bottom wear protection
- Integrated seed deflector on bottom back
- Advanced carbide tile welding technology

Manufacturing

Custom Services

Yes
