Product Overview

Industrial Grade Bead Shaping Tool

This Tungsten Carbide Tipped (T.C.T) drill bit is engineered for the precision production of wooden beads. Featuring fine-grain carbide tips, it offers exceptional sharpness and significantly longer tool life compared to standard high-speed steel alternatives. It is specifically optimized for working with high-grade hardwoods like Padauk and Rosewood, ensuring clean cuts without burning or discoloration.

Technical Specifications

Recommended Operating Speed

1200 rpm
Min Speed

2000 rpm
Max Speed

Cutting Material

Fine grain tungsten carbide

Performance Features

Product Highlights

- Resharpenable cutting edges for extended service life
- No blackening or burning of wood surface
- High-durability carbide tips
- Industrial-grade performance

Compatibility

Compatible Equipment

Bench drill

Suitable Materials

High-grade mahogany, Padauk, Rosewood
