Product Overview

High-Performance TCT Circular Saw Blades

These industrial-grade Tungsten Carbide Tipped circular saw blades are engineered with advanced manufacturing techniques to deliver precision cutting. Designed for versatility, they effectively handle a wide range of materials including soft and hard wood, MDF, veneered boards, non-ferrous metals, steel, and construction materials. Their robust construction and optimized tooth geometry ensure smooth, efficient operation and an extended service life for professional applications.

Technical Specifications

Blade Dimensions

300 mm
Diameter

3.2 mm
Kerf Thickness

2.2 mm
Plate Thickness

30 mm
Bore Diameter

Operating Metrics

- Tooth Count: 96T
- Maximum RPM: 6500
- Part Number: 343003096

Application

Suitable Materials

Soft Wood, Hard Wood, MDF, Veneered Board, Non-Ferrous Metals, Steel, Construction Materials
