

Tungsten Carbide Tipped Circular Saw Blade

Tungsten carbide tipped saw blade designed for cutting various materials. It features precision-ground teeth for smooth and efficient cutting performance and is suitable for use with circular saws and other compatible power tools.

Product Overview

Professional TCT Circular Saw Blade

This Tungsten Carbide Tipped (TCT) circular saw blade is engineered for precision and durability in industrial cutting applications. Featuring high-quality steel construction and precision-ground teeth, it ensures smooth and efficient cutting performance across a variety of materials. Designed for compatibility with circular saws and various power tools, this blade offers long-lasting reliability for demanding work environments.

Technical Specifications

Cutting Edges	2
Blade Material	High-quality Steel with Tungsten Carbide Tips

Compliance and Usage

Compatible Tools	Circular Saws, Power Tools
