Product Overview

Professional Tungsten Carbide Tipped Saw Blade

This high-performance circular saw blade features premium tungsten carbide tipped teeth designed for superior durability and clean, precise cutting performance. Engineered for versatility, it is suitable for a wide range of materials including solid wood, plywood, particle board, aluminum, and plastics. With 80 teeth and a robust construction, this blade ensures professional-grade results across various industrial and workshop applications.

Technical Specifications

Blade Diameter	250 mm
Bore Diameter	25.4 mm
Kerf Thickness	2.8 mm
Tooth Count	80

Performance Metrics

Maximum Operating Speed

5500 RPM
Max RPM

Applications & Materials

Suitable Materials	Solid Wood, Plywood, Particle Board, Aluminium, Plastic
--------------------	---

Safety & Handling

Required Protective Gear

- Safety Mask
- Protective Eye Glasses

Essential Safety Warnings

Always disconnect power sources before installing or changing the blade. Ensure the operating speed does not exceed the maximum rated 5500 RPM to prevent damage to the blade and ensure operator safety. Never operate the equipment without proper safety guards in place.
