Product Overview

High-Performance Cutting Precision

This Tungsten Carbide Tipped (T.C.T) circular saw blade is engineered for versatile and efficient cutting across wood, plastic, and non-ferrous metals. Utilizing a specialized combination of Triple Chip Grind (TCG) and flat teeth, it ensures clean, accurate, and durable performance for both professional and DIY applications. Its robust design is built to maintain consistent cutting quality while extending the service life of the blade under various operational conditions.

Technical Specifications

Maximum RPM

6600 r/min

Max Speed

80 m/s

Peripheral Speed

Diameter

230 mm

Tooth Design

TCG, Flat Tooth

Certifications

Standards and Compliance

ISO 9001 • ISO 14001 • MPA 90364 • MPA 98585

Application

Compatible Materials

- Wood
- Plastic
- Non-ferrous metals
