

Tungsten Carbide Tipped Circular Saw Blade

This circular saw blade is designed for cutting wood and features tungsten carbide tipped teeth for increased durability. The blade has a diameter of 250mm, a thickness of 3.2mm, and a bore diameter of 30mm, with 60 teeth and a maximum RPM of 8000.

Product Overview

High-Performance Cutting Solution

This circular saw blade is engineered for efficient wood cutting, featuring tungsten carbide tipped teeth that ensure superior durability and cutting performance. The blade body has undergone specialized heat treatment to enhance overall strength and longevity. Designed for demanding tasks, it supports a maximum rotational speed of 8000 RPM, making it a reliable choice for professional woodworking applications.

Technical Specifications

Diameter	250 mm
Bore Diameter	30 mm
Thickness	3.2 mm
Tooth Count	60

Performance Metrics

Max RPM

8000 RPM

Maximum Speed

Features & Materials

Material Composition	Tungsten Carbide Tipped, Heat Treated Steel
Primary Application	Wood Cutting

Safety & Compliance

Safety Instructions

- Always wear safety glasses during operation
- Ensure blade guard is properly in place
- Inspect for cracks, breaks, or damage before use
- Follow all instructions in the saw owner's manual
