Product Overview

Versatile Cutting Solution

This tungsten carbide tipped circular saw blade is engineered for precision performance in both ripping and cross-cutting applications. Designed for compatibility with portable machines and table saws, it effectively handles soft and hard solid wood as well as polywood panels. The inclusion of TCT teeth ensures the blade remains durable even when encountering challenging materials like nails or metal clips.

Technical Features

Key Technical Specs

- Tungsten Carbide Tipped (TCT) teeth
- ATB (Alternate Top Bevel) tooth geometry
- Positive cutting angles
- Hardened steel blade body

Suitable Materials

Softwood, Hardwood, Polywood, Wood with nails, Wood with metal clips

Equipment Compatibility

Compatible Machines

Portable Circular Saws • Table Saws
