Product Overview

Professional Tungsten Carbide Tipped Saw Blade

This high-performance Tungsten Carbide Tipped (T.C.T) saw blade is engineered for precision and durability in professional woodworking environments. Featuring a hardened steel body and precision-ground cross-bevel teeth, it ensures clean and accurate cuts through various dry softwoods and hardwoods. Designed to withstand intensive use, the blade includes expansion slots to manage heat dissipation and prevent warping during operation.

Technical Specifications

Tooth Angles

15 °

Primary Angle

13 °

Secondary Angle

Blade Type

Tungsten Carbide Tipped (T.C.T)

Tooth Configuration

Cross bevel teeth with rare tooth geometry

Compatibility

Recommended Tools

Portable Saws, Table Saws

Performance Features

Key Benefits

- Hardened steel body for extended longevity
- Expansion slots to reduce heat accumulation
- Anti-warping design
- Optimized for both soft and hard dry wood
