Product Overview

Professional Performance TCT Saw Blade

This high-performance Tungsten Carbide Tipped (TCT) saw blade is engineered for precision cutting across a variety of materials, including wood, aluminum, plywood, metal, and plastics. Featuring durable carbide tips and optimized tooth geometry, this blade ensures smooth, efficient cuts and extended service life. The hardened steel body provides superior stability, while integrated expansion slots effectively reduce vibration and noise for a professional-grade finish in woodworking and construction applications.

Technical Specifications

Tooth Configuration

120 Z

Tooth Count

Blade Dimensions

Parameter	Value
Diameter	100 mm
Kerf/Thickness	1.7 mm
Bore Size	30 mm

Compatible Machinery

- Circular Saws
- Miter Saws
- Table Saws

Compatible Materials

Wood, Aluminum, Plywood, Metal, Plastics

Features & Benefits

Key Advantages

Vibration Reduction • Noise Dampening • Hardened Steel Body • Precision Cutting
