

Tungsten Carbide Tipped Saw Blade

This saw blade features durable tungsten carbide tips for extended life and clean cuts. It is ideal for woodworking, metalworking, and plastic cutting on circular and table saws.

Product Overview

Professional Tungsten Carbide Tipped Saw Blade

This high-performance T.C.T. saw blade is engineered for precision cutting across a diverse range of materials, including wood, plywood, laminated boards, aluminum, plastics, and metals. The robust tungsten carbide tips ensure an extended blade life and provide clean, accurate cuts for industrial applications. Designed for compatibility with circular and table saws, it minimizes vibration and noise to ensure smooth, efficient performance.

Technical Specifications

Compatible Machinery

- Circular saws
- Table saws

Cutting Applications

Wood, Plywood, Laminated Board, Aluminium, Plastic, Metal

Performance Features

Performance Benefits

1 Level

Reduced Noise
