Product Overview

High-Performance TCT Saw Blade

This Tungsten Carbide Tipped (TCT) saw blade is engineered for professional-grade cutting across various materials. Featuring a durable circular steel body with precision-brazed carbide teeth, it ensures clean and accurate cuts for demanding applications. The advanced cutting edge technology and integrated heat dissipation gullets provide optimal performance and extended tool longevity.

Technical Specifications

Tooth Configuration

3 TPI

Teeth Per Inch (Min)

6 TPI

Teeth Per Inch (Max)

Blade Type

Tungsten Carbide Tipped (TCT)

Design Features

Key Design Features

- Brazed carbide teeth for superior hardness
- Integrated gullets for efficient chip removal
- Heat dissipation slots to prevent warping
- Central bore for standard rotary tool mounting
- Circular steel body for structural stability

Applications

Recommended Applications

Gardening Tools, General Purpose Cutting, Precision Cutting, Professional Sourcing

Performance Quality

Quality Standards

High Quality • Cutting Edge Technology • Durable Construction
