

Turbo Rim Diamond Grinding Wheel

This diamond grinding wheel has a turbo rim design for aggressive material removal. The segmented rim provides cooler operation, reduces friction, and extends the wheel's life.

Product Overview

Turbo Rim Diamond Grinding Wheel

This diamond grinding wheel features a specialized turbo rim design engineered for aggressive material removal and highly efficient grinding performance. The segmented rim configuration promotes cooler operation and significantly reduces friction, which helps to extend the overall service life of the tool. Built with a durable steel core, this wheel provides the stability required for demanding applications on concrete, stone, and various other hard materials.

Technical Specifications

Rim Type	Turbo Segmented
Core Material	Steel

Compatibility

Mounting Holes	Multiple configuration
Suitable Materials	Concrete, Stone, Hard Materials

Performance Features

Performance Advantages

- Aggressive material removal
- Cooler operation during use
- Reduced friction
- Extended service life
