

Turbo Rim Diamond Saw Blade for Masonry

This diamond saw blade provides fast and smooth cutting with free chipping. It is suitable for cutting brick, block, concrete, and other masonry materials, and offers better cooling and excellent dust removal.

Product Overview

High-Performance Turbo Rim Blade

This hot-pressed sintered narrow teeth turbo blade is engineered for efficient and precise cutting of hard masonry materials. The specialized turbo rim design facilitates rapid material removal while significantly reducing heat buildup during operation. Its robust sintered construction ensures exceptional durability and extended service life, making it an ideal choice for professional cutting tasks involving brick, block, and concrete.

Performance & Features

Key Features

- Fast and smooth cutting action
- Free chipping performance
- Enhanced cooling capabilities
- Excellent dust removal
- Narrow teeth design for clean cuts

Compatibility & Application

Compatible Tools

Angle Grinders • Tile Saws

Suitable Materials

Brick, Block, Concrete, Ceramic Tile, Porcelain, Granite, Marble, Stone

Technical Specifications

Manufacturing Process

Hot-pressed sintered
