

Turbocharger Assembly with Integrated Exhaust Manifold

This turbocharger assembly features a turbine housing integrated with an exhaust manifold. The unit includes a wastegate actuator to improve engine performance.

Product Overview

Turbocharger Assembly

This turbocharger assembly is engineered with an integrated exhaust manifold, optimizing airflow and engine performance for heavy-duty applications. Designed for specific engine compatibility, the unit features a durable housing and a precise wastegate actuator for reliable boost control. It is an ideal replacement part for maintaining engine efficiency and power output.

Technical Specifications

Model Number	GT2256
Engine Compatibility	4HG1
OEM Number	8973267520

Key Features

Design Features	Integrated Exhaust Manifold, Wastegate Actuator Included, Multi-cylinder Compatibility
