

Turbocharger CHRA Center Housing Rotating Assembly

This turbocharger CHRA (Center Housing Rotating Assembly) is designed for optimal airflow and boost pressure. The precision-balanced rotor assembly includes a lightweight compressor wheel and a durable turbine wheel to ensure quick spool-up and reliable performance.

Product Overview

Turbocharger CHRA Assembly

This high-performance Center Housing Rotating Assembly (CHRA) is precision-engineered to restore or upgrade turbocharger systems. Constructed with premium K18 material, the assembly undergoes rigorous 100% balance testing to ensure reliability and optimal performance under boost. It is designed for efficient heat dissipation and superior oil lubrication, providing a durable solution for demanding automotive applications.

Technical Specifications

Material	K18
Testing Standards	100% Balanced, Performance Tested

Support and Warranty

Available Formats

- Complete CHRA
- Individual Spare Parts

Warranty Period	1 Year
