

# Turbocharger for Engine Power Enhancement

This high-performance turbocharger is designed to enhance engine power and efficiency. It features a robust construction with a cast compressor housing and turbine housing for durability.

## ADDITIONAL IMAGES

## Product Overview

### Engine Performance Enhancement

This high-performance turbocharger is engineered to significantly enhance engine power, throttle response, and overall acceleration. Designed for robustness, it features a precision-balanced rotor assembly that ensures smooth operation and minimizes vibration during demanding conditions. By increasing airflow and optimizing boost pressure, this unit provides reliable performance improvements for heavy-duty automotive applications.

## Technical Details

### Identification Specs

Property	Value
Model	TD05
Serial Number	16110201
Part Number	49178-02395

### Construction

Cast Compressor Housing, Cast Turbine Housing, Precision-Balanced Rotor

## Performance

### Performance Metrics

**1 Included**

Wastegate Actuation

## Maintenance

### Lubrication

Oil lubrication is required for bearing longevity.
