

Turbocharger for Engine Power Enhancement

This turbocharger enhances engine power and efficiency. It features a robust turbine housing, precision-engineered compressor wheel, and durable bearing system.

Product Overview

Engine Performance Enhancement

This range of high-performance turbochargers is engineered to significantly boost engine power, torque, and overall efficiency. Designed with robust materials for durability, these units improve throttle response and handle high-boost applications with ease. They provide a reliable solution for various heavy-duty and light commercial engine configurations.

Technical Specifications

Compatible Engine/Model Series

Turbo Model	Application / Reference
TB2573	SOFIM 8140.27 (116PS)
TB2577	JX493ZQ1 (92PS)
TB31	CUMMINS 4BTAA (125PS)
GT1749	HYUNDAI EXCAVATOR
TD04	PAJERO / DELLCA 2.5L
H1E	6CTA 8.3L / JI CASE
T04E08	PC300 / PC300-5

Available C.H.R.A. Units

- 408105-111
- 447450-5084
- 447450-5088
- 441398-0042
- 441398-0136
- 434251-0052
- 445074-0027
