

Turbocharger for Yanmar Engines

This turbocharger is designed for Yanmar 3TN82TE, 3TN84TL-R2B, 3TN-84, 3TN84T, and 4TN78TL engines. The turbocharger enhances engine performance by increasing air intake, leading to improved combustion and power output.

Product Overview

Optimized Engine Performance

The RHB31 turbocharger is specifically engineered to enhance engine performance by increasing air intake efficiency. This leads to improved combustion processes and significantly higher power output for compatible industrial engines. Its compact design facilitates straightforward installation, while high-quality components ensure reliable, long-term durability in demanding operating conditions.

Compatibility

Compatible Engine Models

3TN82TE, 3TN84TL-R2B, 3TN-84, 3TN84T, 4TN78TL

Technical Details

Key Engineering Features

- Robust turbine wheel construction
- Precision-balanced rotor assembly
- High-durability bearings
- Compact design for flexible installation

OEM Part Number

129403-18050
