

Turbocharger

This high-performance turbocharger enhances engine power and efficiency. It features a cast iron turbine housing and a lightweight aluminum compressor housing for optimal airflow and boost pressure.

Overview

High-Performance Turbocharger

This turbocharger is engineered for enhanced engine power and efficiency, featuring a robust construction designed for demanding applications. It utilizes a cast iron turbine housing paired with a lightweight aluminum compressor housing to optimize airflow and boost pressure. The unit is built for long-lasting reliability, incorporating a precision-balanced rotating assembly and a durable bearing system.

Technical Specifications

Housing Materials

- Cast iron turbine housing
- Lightweight aluminum compressor housing

Durability

Durable bearing system for long-lasting reliability

Performance Metrics

Performance Features

Precision-balanced rotating assembly, High-efficiency compressor wheel, High-efficiency turbine wheel

Applications

Suitable Applications

Automotive Engines • Industrial Engines
