Product Overview

High-Performance TV Integration

This 10W TV speaker is engineered for clear and accurate audio reproduction, making it an ideal choice for professional television system integration. It features a robust construction designed for durability, ensuring long-lasting performance in various AV applications. With its optimized frequency response and minimal distortion, this component delivers a reliable and immersive audio experience.

Audio Performance

Key Audio Metrics

10 W Nominal Power	16 Ω Nominal Impedance	82 dB Sound Pressure Level
------------------------------	----------------------------------	--------------------------------------

Frequency Response

- Resonance Frequency: 140Hz
- Effective Frequency Range: 140Hz - 12000Hz

Technical Specifications

Power & Distortion

Parameter	Value
Maximum Power	12W
Harmonic Distortion	d5%

Physical Dimensions

Dimensions & Mounting

Feature	Measurement
Front Face	65mm x 65mm
Mounting Footprint	74.55mm x 74.55mm
Overall Height	83mm
Body Height	60mm
Depth	45mm
Rear Diameter	55mm
Mounting Hole Diameter	4
