Product Overview

High-Performance TV Speaker

The Y70-726X is a high-performance TV speaker engineered for clear and accurate audio reproduction. It features a robust construction and optimized acoustic design that ensures a balanced sound across a wide frequency range for an immersive experience. Designed for seamless integration into various television models and audio systems, this speaker provides reliable performance and consistent quality.

Acoustic Performance

Key Performance Metrics

10 W Nominal Power	20 W Maximum Power	7 Ω Nominal Impedance	86 dB Sound Pressure Level
------------------------------	------------------------------	---------------------------------	--------------------------------------

Frequency Response	125-15000 Hz
Resonance Frequency	125 Hz
Harmonic Distortion	≤ 5%

Mechanical Dimensions

Physical Dimensions

Specification	Value
Frame Size	69 x 69 mm
Mounting Dimension	57 x 57 mm
Mounting Hole Diameter	4.8 mm
Depth	37 mm
Cone Diameter	46 mm
