Product Overview

Professional Grade TV Speaker

This 10W TV speaker is engineered for clear and accurate audio reproduction in television sets. With its robust construction, it ensures long-lasting performance and consistent sound quality for an immersive viewing experience. Designed for ease of integration, it features standardized mounting dimensions for efficient assembly.

Audio Performance

Core Audio Metrics

10 W Nominal Power	8 Ohm Impedance	78 dB Sound Pressure Level
------------------------------	---------------------------	--------------------------------------

Frequency Range	130Hz - 15000Hz
Resonance Frequency	130 Hz
Maximum Power	12 W
Harmonic Distortion	d7%

Technical Dimensions

Physical Specifications

Specification	Value
Main Dimensions	55.7 x 55.7 mm
Mounting Holes	4-3.2
Internal Depths	47.3mm, 40.3mm, 38mm, 35mm
