Product Overview

High-Fidelity TV Audio Component

The Y70-2828X is a professional-grade television speaker engineered for high-clarity sound reproduction. Designed for integration into consumer and commercial display units, this speaker ensures consistent performance for dialogue and ambient sound effects. Its robust construction makes it a reliable choice for long-term integration into television audio systems.

Key Features

High Clarity, Television Audio, 120Hz-10kHz, Low Distortion

Technical Specifications

Power & Impedance

8 W

Nominal Power

15 W

Maximum Power

28 Ω

Nominal Impedance

Acoustic Performance

Parameter	Value
Resonance Frequency	120 Hz
Frequency Range	120-10000 Hz
Sound Pressure Level	80±3 dB (1M1W)
Harmonic Distortion	d5%
