

Twin Arm Coil Handling C-Hook

This twin arm C-hook is designed for lifting and transporting coils with enhanced safety. Its adjustable arms allow for accommodating various coil sizes, ensuring a secure grip.

Product Overview

Professional Coil Handling Solution

The Twin Arm Coil Handling C-Hook is a heavy-duty lifting device engineered for the secure transport and manipulation of industrial coils. Its robust twin-arm design provides enhanced stability and safety during overhead lifting operations. With adjustable connection points, this equipment offers versatility for handling coils of varying dimensions, ensuring efficiency in warehouse and manufacturing logistics.

Technical Specifications

Key Design Features

- Reinforced central lifting point
- Heavy-duty connecting chains
- Adjustable beam holes for variable sizing
- Manual positioning handles

Lifting Configuration

Twin Arm, Double Leg, C-Hook

Application

Suitable Applications

Coil Handling • Overhead Lifting • Industrial Logistics
