Product Overview

Professional Twin Core Security Cable

This high-performance twin core PVC insulated security cable is engineered for reliable signal transmission and power distribution in diverse environments. With features like easy stripping and cutting, it is an ideal choice for audio devices, speaker systems, lighting, and low-voltage security alarm setups. Designed for versatility, this cable supports various conductor materials and can be customized to suit your specific technical requirements.

Technical Specifications

Key Features

- Standard thickness insulation
- Easy to strip and cut
- Versatile application range
- Reliable signal transmission

Insulation Material	PVC
Conductor Materials	Oxygen-free copper, Tinned copper, CCA, CCS

Logistics & Packaging

Packaging Options

Packing Level	Description
Inner	Plastic spool, paper drum, or wooden drum
Outer	Carton box

Standard Roll Lengths	100m/roll, 200m/roll, 305m/roll
