

Twin-Cylinder Industrial Air Compressor

This air compressor is designed for industrial and commercial use. It features a twin-cylinder pump, electric motor, and large horizontal air tank for reliable compressed air.

Overview

Industrial Performance

The JWA20 is a robust twin-cylinder industrial air compressor engineered for demanding commercial environments. It features a high-capacity horizontal air tank and a powerful electric motor, ensuring a consistent and reliable supply of compressed air for various pneumatic tools. Built with safety and efficiency in mind, this unit includes integrated pressure monitoring and control systems to support continuous operation.

Technical Specifications

Design

Twin-Cylinder • Horizontal Tank

Model

JWA20

Application

Industrial, Commercial

Features

Key Features

- Twin-cylinder pump configuration
- Integrated electric motor
- Horizontal air receiver tank
- Safety pressure relief system
- Precision pressure gauges
- Centralized control panel
