

Twin Screw Plastic Extruder

This twin screw extruder is designed for processing various plastic materials. It is suitable for producing plastic profiles, sheets, and other extruded products.

Product Overview

High-Performance Twin Screw Extruder

This twin screw extruder is engineered for efficient processing of plastic materials, offering reliable performance for industrial applications. It features a robust stainless steel frame and a precise dual screw extrusion mechanism, ensuring consistent output quality. Equipped with an intuitive control panel, this machine is ideal for the production of plastic profiles, sheets, and various extruded components.

Technical Specifications

Model Number	SLJ-50
Extrusion Type	Twin Screw

Construction

Frame Material	Stainless Steel
----------------	-----------------

Key Features

Core Components

- Material Hopper
- Dual Screw Extrusion Mechanism
- Stainless Steel Frame
- Operational Control Panel

Applications

Suitable For	Plastic Profiles, Plastic Sheets, General Extrusion
