

Twin Shaft Concrete Mixer

This twin shaft concrete mixer is designed for thorough mixing of concrete, mortar, and other construction materials. It features a heavy-duty construction with a high-torque motor for consistent and homogeneous mixes.

Product Overview

Industrial Twin Shaft Concrete Mixer

This robust twin horizontal shafts forced mixer is engineered for the efficient and thorough homogenization of concrete and mortar. Built with heavy-duty components and a high-torque motor, it ensures consistent material output even under demanding conditions. The design features a durable mixing drum and wear-resistant blades, making it an ideal choice for large-scale construction projects and high-capacity precast concrete plants.

Technical Specifications

Key Components

- Heavy-duty drum construction
- High-torque electric motor
- Wear-resistant mixing blades
- User-friendly control panel

Mixer Type	Twin horizontal shafts forced mixer
Primary Applications	Concrete, Mortar, Large-scale construction, Precast concrete plants
