

Twin Tub Top-Loading Washing Machine

This compact top-loading washing machine features a twin tub design for washing and spinning. It offers separate timers for the wash and spin cycles, providing control over the washing process.

Product Overview

Compact Twin-Tub Laundry Solution

This efficient top-loading washing machine utilizes a classic twin-tub design, allowing for simultaneous washing and spinning cycles to maximize productivity. Designed with durability and ease of maintenance in mind, it provides a highly cost-effective laundry solution for smaller residential or commercial spaces. The intuitive interface features independent timers for each cycle, ensuring precise control over your fabric care requirements.

Technical Specifications

Operational Design	Twin-Tub Top-Loading
Control Method	Manual Timer, Dual Cycle Control
