

Twin Tub Washing Machine with Separate Wash and Spin Tubs

This twin tub washing machine features separate tubs for washing and spinning. Its compact design and durable plastic body make it suitable for efficient laundry in small spaces.

Product Overview

Compact and Efficient Twin Tub Solution

The XPB60-288S(A) is a robust twin tub washing machine engineered for convenience and efficiency in diverse environments. By incorporating separate tubs for washing and spinning, this unit enables users to perform both laundry processes simultaneously to save time. Its compact, durable plastic construction ensures longevity while making it an ideal choice for smaller spaces requiring high-performance cleaning.

Performance

Machine Configuration
