

Twist Head Garden Soil Cultivator

This garden twist cultivator features a power-coated carbon steel head. It is a manual tool designed for breaking up and aerating soil with a helical, spiral-shaped tilling head.

Overview

Efficient Soil Cultivation

The Twist Head Garden Soil Cultivator is a professional-grade manual tool engineered for optimal soil aeration and preparation. Featuring an ergonomic T-shaped handle and a specialized helical tilling head, it allows users to break up compacted soil and remove weeds with minimal physical effort. Constructed from durable, rust-resistant steel, this tool is an essential asset for maintaining healthy garden beds and flower plots.

Technical Specifications
